From brainstorming to production - Tribor Design is a strong ship that sails forward thanks to the different phases of product development harmoniously working together.

Development of technological products

info@tribor design.com
tribor design consulting.com

A team with nearly 60+ years of experience in the development of products of all kinds ranging from automotive, military and IOT (Internet Of Things) products.

- Ideation / brainstorm
- Volumetric model
- 3D modeling (Solidwork ®)
- Technical illustration
- Functional prototype
- Pre-production
- 3D Renders

YOU ARE HERE

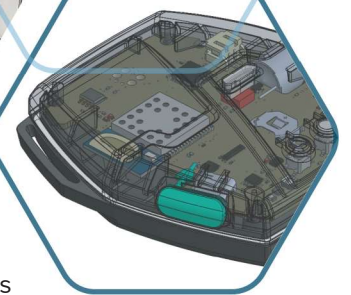

ELECTRONIC DESIGN

PRODUCTION

- EOL and ROHS components analysis
- Parts procurement & supply chain management
- PCB assembly
- Mechanical and system assembly
- Circuit board validation jig design
- PCBa tests and verification
- NPI process validation
- World wide drop ship
- Product management and traceability
- Certification management

- Realization of the schematics & routing of the electronic circuits
- Program design and development
- Digital and analog circuit design

- Design and integration of LCD screens and tactile membranes
- Technological advances in IDO
